

VIDEO FEEDBACK SOFTWARE CHECKLIST

Does Your Video Feedback Software Tick All the Boxes?

These days, K-12 schools and districts are focused on teacher satisfaction and retention. And those goals can only be met when teachers feel supported and prepared. Post-pandemic, **video feedback software has become a key component** of teacher preparation and support.

To help your school or district invest in the best video feedback solution available, we've developed a checklist to ensure your choice in software supports **customizable, flexible, and secure learning experiences.**

Review the checklist below. Each box you check off the list is worth one point—for a maximum total of 23 points.

Instructional Support & Collaboration

Tailored, contextual feedback and collaboration through video sharing mean more effective, fruitful practice and support.

My Feedback Tool

- Allows personalized feedback synced to precise moments in observation videos
- Allows sharing of videos between coaches, mentors, new teachers and administrators
- Increases quantity and diversity of feedback and collaboration by enabling peer review
- Permits creation and sharing of progressions to align with district-prioritized practices
- Features customizable progressions, markers, and library content
- Supports multiple cameras, screen recording, and slide sharing features
- Lets teachers record and reflect on their own work without sharing

Convenience & Flexibility

Education today requires tools that work in classrooms and online, while meeting district goals and budget.

My Feedback Tool

- Is accessible to mentors and coaches—anytime, anywhere
- Includes viewing controls such as pause, slow motion, rewind, and fast-forward
- Requires no special equipment, downloads, or plugins—just the technology already present in the classroom
- Integrates with my LMS and Zoom
- Uses AI technology to display real-time closed captions
- Is a web-based platform
- Accepts all common file types for video uploads
- Offers multimodal feedback—video, audio, and written
- Supports both synchronous and asynchronous feedback

Security

K-12 schools and districts are charged with providing an accessible, private, and secure video feedback experience for every teacher.

My Feedback Tool

- Offers 5-year unlimited, cloud-hosted, high-security video storage
- Features background blur for student privacy
- Grants session-specific, limited access to reviewers for observation and feedback
- Allows secure sharing of videos while limiting access through permission settings and job roles controlled by administrator
- Protects videos with enterprise-grade encryption, security, and data controls
- Sets all videos to "private" by default
- Is COPPA and FERPA compliant

Count the number of items you checked off.

Your Score __ / 23

What's your readiness score?

23: Congratulations! You have the perfect video feedback tool.

15–22: You're close, but there's room for improvement.

10–14: You may want to consider looking for a new feedback tool.

9 or less: It's time for an upgrade.

Whatever the world throws at us post-COVID, video feedback can help both new and experienced teachers develop competence and confidence in all learning environments. The key is investing in a solution that checks all the boxes for teacher support, customization, convenience, collaboration, flexibility, and security.
